

Why Bluetooth marketing?

This is the perfect decision to communicate with your customers in a new way

Every single person will receive individual information

Contact efficiency is much higher comparing to other marketing tools

Information can be saved on phone and be given to friends later

You can collect statistic info and control contact quantity via the Internet

Bluetooth marketing

Kodisoft company presents you new innovativel decision – the first intellectual bluetooth marketing device – IDBM.

Our device can create channels for free and unlimited communication with users and transmit any kind of media to mobile phone, PDA or any other bluetooth-enabled device.

Why kodisoft?

Our price is the lowest because we are the direct manufacturers. IDBM is based on KoSmartDetect Technology, which allows to track up transfer or device problems and is able to detect if the phone is busy.

You can control any IDBM device via the internet.

You can buy or rent the device.

IDBM can do much more than just sending media. For instance, IDBM can be the wi-fi access point, or it can broadcast FM, receive customers' orders, etc.
